

Sinclair Broadcasting is proposing to continue its policy of using the public wave spectrum for its own political gain. First mandating that their stations not provide important and timely information about war dead in Iraq, now Sinclair is choosing to influence a presidential election with its airing of an anti-Kerry political ad.

The FCC should not allow this travesty to occur and should keep in mind Sinclair's action when looking at media consolidation and Sinclair's license renewal.

These airwaves are public and the FCC should work to strengthen the public's access and control of them. Thank you.
